The Autobiography Of My Healing From Cancer: The True Story Of My Healing From Burst Breast Cancer, Lymphoma, Bone And Pleural Metastases Without Chemotherapy, Radiotherapy Or Any Operations.

Synopsis

In the course of her life, Inka Sattler suffered from two different kinds of breast cancer, from lymph cancer and from bone cancer (involving paraplegia), from pleural cancer and leukaemia and two melanomas. The first incidence of cancer began in 2004 and the last ended in 2011. Seen from a purely statistical point of view, she would be dead with 300% probability today if she had decided on conventional medical treatment. At one point she was a case for nursing care at the highest level (3) and was lying in the palliative care unit. Today Inka, a keen horse-rider, has largely recovered and can carry out her tasks in life and even ride again cautiously. What is the basis for this miracle? While Inka was trying out about 20 alternative therapies during her illness, all of which proved to be more or less unsuccessful, useless and even harmful, when it came to the crux she always followed the findings of the "Germanic Medicine" (formerly "New Medicine") of the physician Dr Ryke Geerd Hamer (Norway). This was her recipe for success, which not only several times saved Inka's life but also ensured that she has recovered her health today. Once the cancer diagnosis has hit them, most people do not have the strength to question the procedure prescribed by conventional medicine, let alone escape it. With Inka, it was exactly the opposite and that is the actual miracle. As she used to be a staff nurse, she knew what happened to breast cancer patients, refused to have the standard treatment (chemotherapy), found the Germanic Medicine and survived. That is why her example is so important; for it shows that it is possible to follow the "New Medicine" successfully, when you have already been hit by the hammer of the conventional medical diagnosis and get completely well again! Here you can read how Inka managed to get well again.
