# Global Environmental History: An Introductory Reader (Rewriting Histories)

## **Synopsis**

Global Environmental History introduces this rapidly developing field through a broad and thought-provoking range of expert contributions. Environmental history is a subject especially suited to global and transnational approaches and, over the course of the present generation, an increasing number of scholars have taken up the challenge that it presents. The collection begins with a series of chapters offering truly global visions; they range from reflections on the role of animals in environmental history to an overview of environmental change over the past ten millennia. Part Two switches to a sharper focus, featuring essays that characterize the distinctiveness of certain key regions such as China, Russia, West Africa, South Asia, Europe, and Latin America. The final part of the book examines different forms of modern environmentalism, ranging from the U.S. and its fascination with wilderness, to Japanese concern with human health, and on to Peru and India, where the environmental debate centres on access to resources. Global Environmental History will be an essential resource for students of Environmental History and Global History.

## **Book Information**

Series: Rewriting Histories

Paperback: 480 pages

Publisher: Routledge; 1 edition (December 16, 2012)

Language: English

ISBN-10: 0415520533

ISBN-13: 978-0415520539

Product Dimensions: 6.1 x 1.1 x 9.2 inches

Shipping Weight: 1.6 pounds (View shipping rates and policies)

Average Customer Review: 4.2 out of 5 stars 3 customer reviews

Best Sellers Rank: #431,642 in Books (See Top 100 in Books) #217 in Books > History > Historical Study & Educational Resources > Historical Geography #350 in Books > Textbooks > Social Sciences > Geography #1031 in Books > Politics & Social Sciences > Social Sciences > Human Geography

## **Customer Reviews**

"Environmental history offers a provocative new paradigm and perspective on the human past. This collection of essays, selected from the major journals in the field, demonstrate the intellectual vigor and geographical scope of that new approach. Read them, and your understanding of history will

change dramatically." - Donald Worster, University of Kansas, USA "In Global Environmental History, John McNeill and Alan Roe have put together a stimulating ÆœcanonÆ¢ of great readings. Together they explore many of the key themes in the emerging interdisciplinary field of environmental history, which explores past relations between people and environments historically, geographically, ecologically and through following many other disciplinary paths as well. The Æœglobal synthesisÆ¢ will ultimately need the understandings of many scales Æ¢ global, regional and local Æ¢ and the readings are organised in a way that considers the insights from each. There will, we hope be more such anthologies to follow. This one is a pioneering collection for an exciting intellectual endeavour." - Libby Robin, Australian National University, Australia

John R. McNeill is University Professor in the Department of History and the School of Foreign Service at Georgetown University. His previous works include *Mosquito Empires: Ecology and War in the Greater Caribbean*, winner of the Beveridge Prize of the American Historical Association, and *Something New Under The Sun: An Environmental History of the Twentieth-century World*, winner of the World History Association Book Prize. Alan Roe is a Ph.D. student in Russian environmental history at the Department of History, Georgetown University.

I find the authors a little hard to follow at times, but interesting and informative non the less.

Environmental history is an essential subject in our changing times, and this well-chosen selection of chapters shows its breadth and strength.

As advertised
