Cyberevolution II: Total Recall

Synopsis

Chloe wasn't worried when she got the recall notice on the cyborgs. There was nothing wrong with Kane and Jared. They were hers, and the company was going to play hell finding them and reclaiming them on her deep space salvager. Damon was another matter altogether! She just couldn't understand why Jared and Kane were so against the rescue mission she hatched! It was going to be a piece of cake!

Length: Full Novel
Genre: Futuristic Romance
Rating: Erotica

Author Kaitlyn O'Connor was first published by Harlequin Enterprises in 1994 under the pen name of Madris Dupree after nearly a decade of apprenticeship--struggling to learn the business, the marketing, and the writing skills necessary for a career in commercial fiction. That first published book, a historical, (which was actually her fourth attempt at a marketable piece of fiction) was successful, however, selling nearly 80,000 copies in the U.S., Switzerland, France, and the U.K. She writes various genres (or sub-genres since she always writes romance!) under different pen names. She has written science fiction/futuristic/fantasy under several pen names: Kaitlyn O'Connor, in honor of her Scottish grandmother, Lyssa Hart, and Angelique Anjou (for the French ancestry), all combined here now under the single pen name Kaitlyn O'Connor. Other titles by this author: Alien Breeders II: Deep Penetration The Assassin's Blade Atalantium I: Bride of Atlantis Atalantium II: Neptune's Daughter (Coming Soon) Atalantium III: Maiden of Atlantis (Coming Soon) Babylon: The Rebel's Woman The Barbarian Prince (Coming Soon) Beastmen of Ator: Alien Abduction Below Breeder Breeder Project Chaos Forged Children of Andromeda: Lords of the Sea Conquest Earth: Prince Galen Cyberevolution I: The Awakening Cyberevolution II: Total Recall Cyberevolution III: Abiogenesis Cyberevolution IV: Cyborg Cyberevolution V: Illumination Cyberevolution VI: Cyborg Nation Cyberevolution VII: Rules of Engagement Dark Solstice Discovery: The Forgotten Dragonlord Enslaved I: Genesis Enslaved II: The Spawning Enslaved III: The Gladiators Exiled Forest Whispers The Gate Genus-Unknown: Adaptation Ja-Rael's Lioness Lawgivers: Gabriel The Lion's Woman Lords of Mayhem Night Raven The Ninth Orb The Portal Return to Eden This author also writes under the pen names Madelaine Montague and Kimberly Zant.

Customer Reviews

I really loved Cyborg Nation and I liked Rules of Engagement, both of them are in the Cyberevolution Series but this book really disappointed me. The other two books had romance, clumsy attempts at courting, and you can feel the emotions from the characters. But this one, omg, 6 men...isn't that seriously a bit much? I think 3-4 guys is good and more than enough, because then you can get to know each one individually. A woman doesn't need more than 3-4. What is this? Some kind of harem or stable, why not a dozen then? Geez. I feel that in the book, Sebastian, Lucien, and Thor kind of blended together and didn't have much personality and they didn't feel different from the other. I didn't know much about each of them or cared. Jared, Kane, and Damon would have been enough...but no, the author had to throw in 3 more guys who are just "all about sex" and thinking with a certain organ. And guess what? Those stupid 3 guys, Sebastian, Lucian and Thor had to ask her for an orgy or a foursome because it's kinky. She didn't even want to do it, but they kept asking and she finally agreed. I'd have just walked away or said whatever. And how can there be a lot of romance when there's a sign up sheet for sex and they are on a nightly rotation? That's seriously messed up. And for her to even consider it? My opinion of her kind of went downhill from there, and just because Sebastian, Lucien, and Thor happened to be rescued too and part of the crew now...doesn't make them equal to the other three that she obviously has known a lot longer and care about. How can she just make them a part of the family too? Is it that easy to

pick up strays? ARghhh!!! I'm frustrated. I was grinding my teeth. I just feel so cheated with this book. And the atmosphere just isn't even conducive to romance. How can it be romantic when another crewship mingles with your crew, and it's all a bunch of strangers you don't know because you're trying to help them out to find a planet to settle. In the mist of all the strangers and not having any quality time with any of the men, I would think that the woman would just be indifferent to it all, especially if she had to sleep with each one on rotation. Geez. I wish I can ask for my money back. I shouldn't have wasted my time.

Could not put it down can't wait for other books in the series she is a very good writer!

I have read all of the books and really hope that the author writes one that ties all of them together. I really love the series, however, I want one that completes the stories of each family and I want to read another book in this series.

Great series. Hope for more

I like this one (#2) the best of the ones I've read so far. (#6 & #7). I've read them out of order because I wasn't sure I'd enjoy the series & the reviews have been very mixed - the negative reviews striking notes with me of things I don't like. However, after reading the 3 I've read, I'm still interested despite the heavy amount of internal dialogue that's used in all of her writings. I've found the ones I've read to be pretty good stand-alone stories but there are references here & there I'd have understood better if I had more familiarity with the earlier books. This story is one I'd reread. There were humorous moments & appealing characters. Chloe is not a take-charge heroine but not a wuss either. I don't like that every other sentence ends in the same profanity. While roughnecks might cuss a lot - the cussing usually has some variety which would have been welcome. There were times the curse words got in the way of understanding the sentence! The sex scenes were more or less redundant despite the one that was more creative. Still - a book that I was happy to pick up again when chores were done.

So far this is my favorite book out of the series. The premise of the books are that Cyborgs created by man become self aware and can think for themselves. They are sentient beings instead of just machines. This leads to a recall where they will be destroyed as Earth sees them as a threat and danger. Chloe and her late father are deep space salvagers when they found Jared and Kane, two

cyborgs near death, on Xeno-12. Chloe nurses them back to health and convinces her dad to keep them on their ship. She sees them initially as her "best buds" and not romantically much to their chagrin. Her adventures begin when there is a recall of Cyborgs and she goes to save Damon a pleasure droid she lost her virginity to at a brothel. Even though the Cyborgs are grown men, they are experiencing their awakening to self awareness and are trying to figure out their new feelings which puts them closer to teenagers emotionally as they experience their hormone drives. There is a lot of humor in how they deal with jealousy , attraction to Chloe, and of course sex. I'd be nervous in meeting a Cyborg only because of how quickly they formed attachments and attractions to Chloe and they are horny as hell, but they are capable of love and having deep feelings and caring. If you are not interested in reading about six men and Chloe being together this might not be for you. For me Damon, Jared, and Kane would have been enough. Thor, Sebastian, and Lucien seem to be in the story only to unite Damon, Jared, and Kane in their pursuit of Chloe, but I still enjoyed this book.

with these Cyborg books. Her Cyberevolution series has been really well done, very original and really hot. I've enjoyed the Cyborgs created with an overabundance of biological material which takes them beyond robotic machine to more human and aware as the years go by. So they're not so great with the human feelings, they don't understand subtlety and nuance which makes for some hilarious dialogue, misunderstandings and oh so lovely sex. Heh.
