# **Aion: Researches Into The Phenomenology Of The Self (Collected Works Of C.G. Jung Vol.9 Part 2)**

## Synopsis

Aion, originally published in German in 1951, is one of the major works of Jung's later years. The central theme of the volume is the symbolic representation of the psychic totality through the concept of the Self, whose traditional historical equivalent is the figure of Christ. Jung demonstrates his thesis by an investigation of the *Allegoria Christi*, especially the fish symbol, but also of Gnostic and alchemical symbolism, which he treats as phenomena of cultural assimilation. The first four chapters, on the ego, the shadow, and the anima and animus, provide a valuable summation of these key concepts in Jung's system of psychology.

## Book Information

Paperback: 353 pages

Publisher: Princeton University Press; 2nd ed. edition (June 1, 1979)

Language: English

ISBN-10: 069101826X

## Customer Reviews

"Much of the material in this book and many of the conclusions are fascinating. There is a great deal here to illustrate the background of modern mysticism and much which the reader, of whatever orientation, will regard as insight."--*Psychiatric Quarterly*"Aion contains some of Jung's most advanced thinking on the integrative principles of the psyche, and on the relation of matter to the symbolic processes of the collective unconscious. This is difficult ground to explore, but those who attempt the journey will find that their horizons have been surprisingly widened."--*Psychosomatic Medicine*

Aion is a continuation of Jung's work in psychology. He explores the role of symbols in archetypes and how symbols are used to creation connection with archetypes, as well as exploring different

aspects of a person's sense of self. I found the book to be useful for understanding Jung's contribution to psychology and why his work has continued to be significant. If you're interested in psychology or just want to understand Jung, this is a good book to pick up.

This is the first Jung I have ever read. It's an intriguing guide and opening experience. Without a doubt I recommend this book. For me, and getting through it required remembering what it is not trying to be or do.

This book is part of the full works of Jung and is fascinating to read if the study of psychology is part of your interests. I won't review Jung's views, as a serious treatment should be reserved for scholars to review instead of me. So read and judge for yourself and maybe you'll enjoy it as much as I did.

Difficult, but insightful. Worth the read

We choose Privacy in the return and the exploration of how we take responsibility of what we do and order are lives in the process of experience and madness of cultural context and life. This is dense read and can trigger a lot of life memories buried in the ground of the world we live in. Its something that notes and humility come in heady as an approach to what is in front of you. For my favorite collection of the works by C. G.Jung, I say five stars. I am the most interested in his ideas of the mortal's God-image, restoration, and shadow. Here is an overview: The totality of images which the unconscious produces are similar 'reformations' of an *apriori* archetype (the mandala); this is in exact agreement with empirical findings of psychology, that there is an ever-present archetype of wholeness that may easily disappear from the purview of consciousness or may never be perceived at all until a consciousness illuminated by conversion recognizes it in the

figure of Christ. As a result of this 'anamnesis,' the original state of in oneness with the God-image is restored. It brings about an integration, a bridging of the split in the personality caused by the instincts striving apart in different and mutually contradictory directions (in the shadow) (40).

There is so much trivial stuff and useless junk in this book, footnotes are larger than the main text. You lost your way and can't grasp the meaning Jung has to offer. Also you must be a fully loaded intellectual to get a whole paragraph without saying "Who/what the heck is this" which I don't think is a downside. In my opinion there are such valuable parts in this book but only for the experienced Jung reader otherwise it is a swamp because he is showing off his talents and knowledge. You have to use the smallest fork instead of a big shovel.

"Jung in a nutshell" does not do justice to this topic. It is a bowl of nuts. But my very rudimentary understanding (to put forth one nut of many) is that consciousness, or the differentiation of self is a progression, which arises from a world of the unconscious. Anybody might say such a thing and get lucky, without having read Aion at all. But to read Aion and then say it is putting your money where your mouth is. The template of self begins at the *Anthropos* (relying on the second-to-last chapter on the *quaternario schema*), and crystalizes in the *lapis*, where consciousness becomes fully realized. Jung was not proselytizing Christianity, but used Christ as an allegory of development of self. This is why he resorts to alchemy and Gnosticism, more than patristic forms of Christianity. He saw the philosophical underpinnings of Christianity as a workable model to explain how the higher human, who operates on his environment as well as on his own thinking, rises above his primal, animalist *soma*. We began as a perfect template in the realm of the unconscious, we descended into the world of formation (borrowing from the Sephir *Yetzirah* here), or "Physis," as Jung called it, only to rise again through the *quaternario ladder* to become *Anthropos* once again. By the way, the reader might note that in later chapters Jung seems to drop any mention about "Aion", a term better explained in the middle parts of the book (Ch. 5-11). I think Jung wanted us to apply his *quaternario* model on a meta-scale, not just as an explanation of the perfection of self and the emergence of consciousness. As we know, we are nearing the end of the present Piscean Aion (the Jesus era), which was preceded by the war-like Arien Aion (the Greco/Roman conquest era), but which is to be followed by a more intellectual Aquarian Aion (whatever that will be). The progression of the Aions, I think Jung hoped we would discern, correspond directly to his *quaternario schema*, and that human consciousness is tied to the meta-physical laws of the universe (in this case, astronomy) just like the ocean's tides correspond to the lunar phases.
