This book discusses addiction counseling and has many examples of wide variety of clients (a real strength). In terms of counseling theory, the book tends to use a reality-based pragmatic approach rather than an extensive investigation and extended discussion of specific counseling theories.

I bought this for a class and then decided to drop the class because of my schedule. I have actually flipped through and read parts of the book. It is really interesting. I know that most people think of addiction as something like drugs or alcohol but in reality I would bet we are all addicted to something. Our phones, iPads, tv, foods, games, Facebook, and the list goes on. I think that by understanding addiction and learning how to deal with it we can help maybe ourselves and others around us. As a nursing student I think it is useful but also as a person. I probably check my phone, grades, and Facebook enough to qualify as an addiction.

love this book, very useful for study and future use in the field.

Just the book I needed for an addiction license exam. I comes highly recommended from several sources. Loaded with information, the kind of information that is expected on the exam. I am very satisfied with this book.

I had to get this book for class, I rented it but honestly it's such a good book to have if you're going into this career field that I ended up converting to purchase and keeping it. Good book.

This book wasn't exactly what I was looking for and the print is rather small. I am into the 4th

chapter so far so haven't read the whole thing yet.

For drug and alcohol counselors this may be 101 level material. For other mental health clinicians (social workers, mental health therapists, etc) this text is indispensable. I have encountered other texts that do not come even close to the quality of this text. Concise, it gives a brief over-view of the different drugs and mental disorders that are commonly comorbid.

great overview of the clinical point of view-- far reaching and detailed --- a wonderful text for the new clinician.
