Quantum Memory: Learn To Improve Your Memory With The World Memory Champion!

Synopsis

Develop a quantum memory so powerful, you're like a human computer! You'll learn to remember names, faces, numbers, birthdays, dates, appointments, or any sequence of numbers you want. Once you have unleashed your memory power there will be no limits to the type or quantity of information you wish to store. In this Quantum Memory Power program I am going to explain a system that I developed which I believe has been pivotal in enabling me to win those World Memory Championships. It is so devastatingly effective that unfortunately for me, my rivals in competition are now using this system to try to beat me and one or two are getting too close for comfort. With each powerful technique I give you, I'll give you practical applications and exercises to test and strengthen your abilities in each area. You'll be using your imagination and creative powers in ways you never imagined to gain speed, accuracy and poise in the development of your own special quantum memory powers. In Quantum Memory Power, you'll learn: How your brain operates To improve your decision making powers The exciting world of mnemonic symbols. A powerful way to remember directions To develop laser-sharp concentration How to ace a tough job interview Developing a mental fact file An increased sense of self-confidence To memorize a deck of cards and gigantic numbers You're about to take the journey of a lifetime. I guarantee, you never realized that learning could be such fun. Develop a quantum memory! See you at the next World Memory Championship!

ASIN: B00OH7DQ7G

Best Sellers Rank: #36 inÂ Books > Self-Help > Memory Improvement   #659 inÂ Books > Audible Audiobooks > Health, Mind & Body > Self-Help

Customer Reviews

This is a great course for covering many memory techniques, presented by a master. Dominic walks you through all of the basics of memory skills in a clear, conversational manner that is easy to follow

along with and learn as you go.I had read books on the subject before this, like 'Moonwalking With Einstein' by Joshua Foer, so I had some basics to build on, but Dominic presents his "Dominic System" of memorization, and guides you through every step of building your own Dominic System and many applications of it.Since listening to this, I've created my own system, and used it to memorize Pi to the 220th digit, 75 elements of the Periodic Table and their atomic numbers in order, as well as memorizing 35 shuffled cards. (All works in progress, of course!)It takes some work up front to create your system list, which you will learn about, but it is absolutely worth it. I had fun building mine.The presentation is great. It's read by Dominic and, like I said, is very casual; it feels like he's sitting across from you just having a chat.I've recommended this to several people, and now you are one of them!
