Women And Leadership

Synopsis

For most of recorded history, men have held nearly all of the most powerful leadership positions. Today, although women occupy an increasing percentage of leadership positions, in America they hold less than a fifth of positions in both the public and private sectors. The United States ranks 78th in the world for women's representation in political office. In politics, although women constitute a majority of the electorate, they account for only 18 percent of Congress, 10 percent of governors, and 12 percent of mayors of the nation's 100 largest cities. In academia, women account for a majority of college graduates, but only about a quarter of full professors and university presidents. In law, women are almost half of law school graduates, but only 17 percent of the equity partners of major firms, and 22 percent of Fortune 500 general counsels. In business, women constitute a third of MBA graduates, but only 5 percent of Fortune 500 CEOs. In *Women and Leadership*, the eminent legal scholar Deborah L. Rhode focuses on women's underrepresentation in leadership roles and asks why it persists and what we can do about it. Although organizations generally stand to gain from increasing gender equity in leadership, women's underrepresentation is persistent and pervasive. Rhode explores the reasons, including women's family roles, unconscious gender bias, and exclusion from professional development networks. She stresses that we cannot address the problem at the individual level; instead, she argues that we need broad-based strategies that address the deep-seated structural and cultural conditions facing women. She surveys a range of professions-politics, management, law, and academia-and draws from a survey of prominent women to develop solutions that can successfully chip away at the imbalance. These include developing robust women-to-women networks, enacting laws and policies that address work/life imbalances, and training programs that start at an earlier age. Rhode's clear exploration of the leadership gap and her compelling policy prescriptions will make this an essential book for anyone interested in leveling the playing field for women leaders in America.

Customer Reviews

A+

Although this isn't something I would read for fun, it was definitely worth reading. Each chapter is from another author addressing another subject, so that definitely made this book a little more interesting than your average academic work. Highly recommended for a college class, I've used this book as a reference in multiple classes.

This was a required text for a women leadership course I took in grad school. It was a really interesting read. Great info, from sources you admire.

Very pleses.

Very poor selection to teach a graduate level course. It posed little to no academic value.

Fast delivery and the book I ordered. No issues.

Perfect Thank you!

Used this book for a class- easy to reference good material
