National Geographic Readers: Great Migrations Elephants

Synopsis

This exciting reader follows the story of the longest and the most demanding elephant migration on the planet. Living at the furthest corners of the hot and dry Sahara Desert, the very margins of where elephants can survive, hundreds of these great creatures make a dangerous but necessary journey as their main source of food and water dries up and they must go in search of more. Battling 120-degree heat, sandstorms, and fierce thunderstorms, these amazing animals travel 35 miles a day in a race against time in search of the bare essentials of life. National Geographic supports K-12 educators with ELA Common Core Resources. Visit www.natgeoed.org/commoncore for more information.

Grade Level: 2 - 4

Customer Reviews

LAURA MARSH is a long time contributor to National Geographic Children Books. She has written a large number of books in National Geographic Readers series and also in Mama Mirabelle and Toot and Puddle series.

Given to 5-year old niece as a present. She liked the other elephant book better, a picture book

about elephants, at least upon opening the gift. Take note that she doesn't read yet. Her Mom reads to her, so I think this is a save-for-bedtime book.

These are awesome books. We have a grandson who is in love with animals, and I credit these books with starting his ability to read. You can't go wrong with these books as a gift. And, they're probably appropriate for kids through grade school. Will buy more!

My kid loves it.

Always love the facts and great pictures in the kids National Geographic's.

National Geographic books are perfect for teaching little ones about the world. I have purchased all of them for my grand-daughter, and they never disappoint, highly recommended for children of all ages.

I bought this for my granddaughter who loves elephants. This book is wonderful - the pictures are amazing and the book is loaded with facts about elephants you would probably never find anywhere else. I enjoyed reading through the book and learned things I never knew about elephants. This would be a great book for children and adults. I was very satisfied with my purchase.

My 7 year old loves this book from beginning to end. It's very informative and a great read. Your child will love this book!

My kindergartener loves elephants and is a proficient reader. He loves reading this book and learning new facts about elephants! Glad I got it.
