Conducting Research Literature Reviews: From The Internet To Paper (Volume 4)

Synopsis

Providing readers with an accessible, in-depth look at how to synthesize research literature, *Conducting Research Literature Reviews* is perfect for students, researchers, marketers, planners, and policymakers who design and manage public and private agencies, conduct research studies, and prepare strategic plans and grant proposals. Bestselling author Arlene Fink shows readers how to explain the need for and significance of research, as well as how to explain a study's findings. Offering a step-by-step approach to conducting literature reviews, the Fourth Edition features updated examples and covers: how to select databases and evaluate their quality; selecting and organizing key words and other terms in order to effectively search databases and the Web; setting standards for evaluating the quality of research and other literature; extracting and recording information from articles and studies; synthesizing what the reader finds either descriptively or via a meta-analysis; recording and storing the results in a virtual file cabinet; and how to use bibliographic software.

Customer Reviews

This is a great book for students, both for classroom use and to keep on their bookshelves once they graduate.--Gail Spencer" This book is a textbook with apparatus: opening summaries of the each chapter ("A reader's guide") exercises with suggested answers, and references cited in each chapter. But this book is much more than a how-to for students to learn how to design and write literature reviews. Fink devotes considerably space to the always tricky question of how to evaluate

the actual articles you select to review."--Tom Warren "Journal of the Society for Technical Communication ""Classed with scientific research handbooks, Fink's work provides examples of designs and analytical concepts from medical, educational, psychosocial, and business domains. She laudably holds qualitative and observational research designs to the same standards of reliability and validity as experimental research."--P.E. Sandstrom "CHOICE ""I think this text presents the goals/reasons, thought-process, and practical steps involved in writing literature reviews in a much more logical and approachable (readable) manner than many I have seen."

--Julia L. Sloan, Cazenovia College --Julia L. Sloan (06/24/2013)"The material is an exemplary mix of explication and illustrations of the steps in finding, reviewing, and evaluating the research for a literature review." --Walter J. Ullrich, California State University, Fresno --Walter J. Ullrich (06/24/2013)"The text provides a thorough and comprehensive overview of the literature review process. I am particularly pleased that the text provides a detailed discussion of how best to choose online databases and provides specific strategies for obtaining optimal search results through the use of Boolean operators." --JaMuir M. Robinson, Walden University--JaMuir M. Robinson (06/24/2013)"The book is an in depth discussion of the literature review journey, highlighting many issues and pitfalls which could hinder the successful completion. The reader is guided through the journey with realistic advice and an explanation of key terms to ensure a successful search that is productive, fruitful and reliable." --Suzanne Sinclair, University Centre at Blackburn College--Suzanne Sinclair (06/24/2013)"I think this text presents the goals/reasons, thought-process, and practical steps involved in writing literature reviews in a much more logical and approachable (readable) manner than many I have seen." --Julia L. Needed for class

Like the title says, it does a great job of showing how to conduct a literature review.

Very helpful with my research class this semester!! I found the entire book quite useful and believe anyone attempting a literature review assignment would benefit from reading it.

A must read for any researcher.

My 10 year old, who is obsessed with Paris, loves it! Perfect size and easy to clean. Love that is zippers.

I would like a refund. Not what I expected.
