IV Therapy Demystified: A Self-Teaching Guide

Synopsis

Your solution to mastering I.V. therapy Looking for a quick way to learn the ins-and-outs of I.V. therapy but find other books dripping with complexity? Here's your lifeline! I.V. Therapy Demystified infuses essential information with clear explanations to make learning easy. Written by a nursing professor, this detailed guide covers fluids and electrolytes, I.V. therapy delivery systems, and peripheral and central I.V. therapy. You will learn about crystalloid and colloid solutions and blood component, parenteral nutrition, and pharmacological therapies. I.V. therapy in infants, children, and older adults is also covered. Filled with key terms to help you to remember important concepts, and complete with end-of-chapter quizzes to test your knowledge, this book will teach you the fundamentals of I.V. therapy in no time at all. I.V. Therapy Demystified is your shortcut to mastering this essential nursing topic. This fast and easy guide offers: Learning objectives at the beginning of each chapter An NCLEX-style quiz at the end of each chapter to reinforce learning and pinpoint weaknesses Measurements labeled in SI units Indications for I.V. therapy and options for delivery A time-saving approach to performing better on an exam or at work

Customer Reviews

Kerry Cheever is currently the head of the Nursing Department at Moravian College. Prior to this position, Dr. Cheever served as associate professor and chair of the Department of Nursing and Health at DeSales University since 1999. She taught in both the undergraduate and graduate

nursing programs. She is a commander in the United States Navy and has extensive experience in Critical Care, Trauma and Emergency nursing. Previously, she served on the faculty at Marquette University, the University of Wisconsin-Madison, and the Medical University of South Carolina. Cheever's publications include recent articles in the Journal of Cardiovascular Nursing, Journal of Religion and Health, Journal of Nursing Education, and Journal of Child and Adolescent Psychiatric Nursing. Cheever is an associate editor of the forthcoming 11th edition of Brunner & Suddarth's Textbook of Medical-Surgical Nursing (the 10th edition is the most widely used medical-surgical nursing textbook in the world. She also has authored two chapters for the text). Currently, she has a work in progress entitled Adult Health Case Studies: Fostering Clinical Reasoning Skills in Novices, which has been accepted for publication. Cheever received her PhD in 1993 from the University of South Carolina, and MSN in Adult Health in 1990 from the University of Florida, and a BSN from Allentown College of St. Francis DeSales in 1980. She holds additional postgraduate certificates in acute care nurse practitioner studies from Marquette University and the BioEthics from New York University.

I have added this to my group of useful nursing school supplementary resources. It is very helpful and an older edition does not make a lot of difference.

This book provides a great introduction to or an overview of IV therapy... it can be a little distracting to read because there are a number of typos. The entire "Demystified" series provides accurate info (yet most seem to include typos - where was the proof reader???) presented in clear and simple terms. Great for someone new to the topic or someone having difficulty grasping concepts as presented in more technical texts.

delivers what title promises Very informative Worth the buy. I wish I had this book available to me while in nursing school.

Good

great!

A must have!

Thanks

This book is written for dummies. It is the greatest learning tool to help you learn IV therapy. I cannot believe this book is not a standard classroom tool for all nurses. I don't know of anyone who will sell you their copy, they keep them for quick reference.
