Life 2.0

Synopsis

Have you ever wondered about life in its entirety? Not just your lifespan, but the entire cycle of life? Why are we born and what is the meaning of life? Is this all a technology play, is this something more spiritual or is this a combination of both? Life 2.0! ignites the ideas and concepts for many of these topics. We must be curious about how the world around us came into being, how is it going to change in the future and how that would, in turn, affect us. Does technology, our religious scriptures, the concept of karma, the soul, genetic engineering and God all come together at some point? Will this all make sense one day? Or, are these different universes of their own and if not, will they be able to co-exist together? Of course, everything is just an assumption, guess or theory at this point in time. Life 2.0! gives you something to consider and helps kindle your thoughts towards the meaning of our existence. It is an attempt to show and get a glimpse of the future, considering the interesting facts that have occurred, are happening and are going to happen - Life 2.0!

Samrat has traveled globally in his life and has had the opportunity to meet with different people and understand different cultures in his lifetime. From an early age, he has tried to understand the meaning, and the reason behind our traditions and our rituals as they all seem to be working for or in a quest to reach out to a higher power out there. Hailing from the hi-tech industry, Samrat has seen the advancements happening in the technological space and is helping shape some of the things to come in the future. He has a very inquisitive mind into the vast realms of this universe and what is truly happening out there and how are we a part of it. To this end, Samrat has been studying and trying to understand the way the people are oriented globally, the rich traditions that different

people of the world have and how have they evolved and how and if there is a connection between them and the way our universe operates.

I loved this book! It's difficult to talk about certain topics and hear the opinions of others, but Samrat did it in such a way that it feels conversational. Life 2.0 offers many great points and made me sit down and really think about how I feel about the future. I encourage anyone who haven't put much thought into our future to read this!
