Me And My Place In Space (Dragonfly Books)

Synopsis

Where is the earth? Where is the sun? Where are the stars? Now in a Dragonfly edition, here is an out-of-this world introduction to the universe for children. With earth as a starting point, a young astronaut leads readers on a tour past each planet and on to the stars, answering simple questions about our solar system. In clear language, drawings, and diagrams, space unfolds before a child's eyes. Colorful illustrations, filled with fun and detail, give children a lot to look for on every page and a glossary helps reinforce new words and concepts. A terrific teaching tool, *Me and My Place in Space* is an easy and enjoyable way to introduce the concept of space to the very youngest astronomers.

Age Range: 3 - 7 years

Grade Level: Preschool - 2

Customer Reviews

PreSchool-Grade 2-The creators of *Me on the Map* (Crown, 1996) trump Robin Hirst's *My Place in Space* (Orchard, 1990) by adding a tour of the solar system to their young narrator's cheery recitation of her place in the universe. Donning an imaginary space suit and dashing off childlike crayon drawings as she goes, the russet-haired tour guide takes viewers past the Moon, Sun, and each planet, then out to the Milky Way and beyond. At each stop, she furnishes a digestible fact or

two (Venus's "gleaming cloud cover makes it the brightest planet of them all"). Finally, she returns to her room to wonder, "Way out in space, is there another...planet like Earth? With another someone like me? Could be." Cable fills the spaces behind and around the crayon art with soft-focus views of a well-furnished playroom or unobtrusive star fields. Pair this upward-facing journey with Steve Jenkins's *Looking Down* (Ticknor & Fields, 1995) to give young children a clearer idea of the universe's size and structure, as well as their own places in the physical scheme of things. Great introduction

I love all the products

This is a great book for kids 4 years old and up. The illustrations are bright and colorful. The author presents an educational topic in an entertaining format for young children.

i got this book to introduce my daughter (3 y/o) to more scientific books, and she is fascinated by all the pictures. we love it

This book is a fun entertaining for a child and you will enjoy reading it together. Easy for them to read to you and beautiful artwork.

I bought this book to introduce a unit on Saturn for my third grade class. When I first scanned the book I thought maybe I'd made a mistake and bought something beneath their level. Not so! I read it

aloud to them & they loved it. They all wanted to take it home to read again.

This is a fun book to help children visualize their place in space. Really fun to read. My kids liked it.

Perfect. Just as expected.
