Customer Reviews

I'm relatively new to Oncology and am studying for the certification exam. This book is great.... has

awesome explanations and is very readable. Questions at the end of each chapter that are relevant with good explanations. I would def recommend this book!~!

The book is an easy read and goes into depth about all types of cancer. This book was used for my Complex Health class in a BSN program. The test questions after each chapter are very helpful! It is a great starting point for understanding the ends and outs of oncology nursing.

No pictures. Just black ink. Boring. However, valuable information.

I think this is a wonderful book. So many descriptions ...explanations etc..... I have learned so much in a very short amount of time .

Very good book. Came in time. Just as I expected

Just beginning the course. I find this material easy to follow and well organized. My oncology course is aligned with this text, which helps.

Very good information for Oncology nurses in each field. In patient, clinic, infusion, radiation, or hospice or other areas.

Excellent study tool. I recommend this text book highly.
