Customer Reviews

Franko Maps Ltd. is known for producing the best travel, dive and snorkel maps, guides and fish cards for the Caribbean and other locations worldwide.

The upside is they actually make them. They are great underwater. It's nice to have something compact to take with you. Downside they have very limited space. The maps are pretty general. They don't show depth contours. In the case of this card they didn't even name the sites. The rear side is fish identification. Those pictures are so small you can barely ID anything. Beyond that they use the same chart for the Bahamas and Roatan. I think that part is pretty useless. The map shows you dive site locations. The one we have for Roatan names the sites too. The price is really great. We buy them for all the places we go. To be better they would need to be folded to have twice the resolution on the fish ID, limit it to the fish at a location, name the sites on all maps, and put in water depth contour lines.

card is like a small dive card my eyes cant read print and a few location names no locations really, its ok but not worth the money\$\$

Great

excellent quick reference and great memorabilia from your trip

Good map

No information as to location or reefs.
