# Winningham's Critical Thinking Cases In Nursing: Medical-Surgical, Pediatric, Maternity, And Psychiatric, 5e

## Synopsis

Develop your critical thinking and clinical reasoning skills with 150 realistic case studies from the four major clinical practice areas: medical-surgical, pediatric, maternity, and psychiatric/mental health nursing. Each case covers a common problem, drawn from actual clinical experiences and written by nurses who are clinical experts. All cases have been thoroughly updated and revised to reflect current clinical practices, with integrated content on pharmacology, nutrition, and diagnostic/laboratory tests to encourage you to think critically about all aspects of care. This fifth edition also features an increased emphasis on patient management, and new documentation and communication exercises. Plus new NCLEX® Examination format-questions help you prepare for success on the NCLEX® Examination and provide safe, quality patient care. Three-part organization presents cases in three parts: 1) Medical-Surgical Cases; 2) Pediatric, Maternity, and Psychiatric Cases; and 3) Other/Advanced Cases, the latter covering key topics such as multi-system disorders and emergency situations. Realistic case study approach incorporates cases drawn from actual clinical experiences to help you identify changes, anticipate possible complications, and initiate therapeutic interventions. Increasing case complexity provides you with a foundation on which to build as you advance to more difficult cases. Two new pediatric case studies strengthen your ability to recognize and effectively manage common disorders presenting in pediatric patients. New NCLEX Examination-format questions have been added throughout, including multiple choice, prioritization/ordering, chart/exhibit, and dosage calculation questions. Increased number of higher-level questions requires clinical reasoning rather than simply memorizing and recalling information. An emphasis on patient management reinforces the type of clinical decision-making needed in the clinical setting as well as reflecting the type of questions on the latest NCLEX Examination. Over 25 new illustrations and graphics such as ECG strips, lab/diagnostic test reports, anatomical diagrams, and medication labels are now interwoven throughout the book. New documentation and communication exercises ask you to document relevant patient information or to use the "SBAR" communication technique to communicate patient findings to the physician.

## Book Information

Series: Winningham's Critical Thinking Cases in Nursing

Paperback: 688 pages

Publisher: Mosby; 5 edition (June 14, 2012)

## Customer Reviews

Do not buy! We purchased this book for continuing education at our hospital. There are no answers for the questions, and we tried to get the teachers guide and of course they would only let college instructors receive the guide. It took forever for their response regarding the teachers guide, therefore we were past the time of being able to return the book. Save yourself the money, you learn nothing from this book! It is only scenarios!

this book was difficult to go through on an individual basis, could be different in the classroom setting if its being taught. also no answers so there is no way to check if your train of thinking is correct.

Half of the book was not uploaded. I am very disappointed, this is the first time this happened to me.

Great tool for studying but you can't confirm all your answers. (NO ANSWER KEY which I think absolutely sucks!!!) ... I like it but not that much!

I found this book to be a waste, there isn't an answer key to the case studies. I ended up returning it.

It's required reading, I got the wrong book. It's a great value and has some good critical thinking even though I received the wrong book!

Great book without of helpful information about critical thinking.

I received this book along with all my other required books in a timely manner and I paid a great deal less for them than I would have if I purchased them from my college bookstore. Book was brand new as described and wrapped in protective cellophane.
