Customer Reviews

I bought two, one for myself and one for my mother. We compete to see who can solve them the fastest. I've had a few books of cryptograms but this one was one of the best. I've worked every puzzle. #171 gave me a run for my money!! Loved the challenge. Highly recommend this book.

I just got started, but look forward to this book. I am great at numerical-based puzzles, so this type is both new to me and initially challenging.

I am not smart enough to do these but my gentleman friend loves these

I buy cryptogram books for my neighbor. She loves this one.

I got this as a gift for my mother who LOVES cryptograms. She was very happy with this and she has already finished the book!

One of my favorite past times and these are all doable.

Great

bought for a friend, haven't given it to her yet. The only thing I didn't like about this book was that the hints weren't on the same page as the puzzle itself. otherwise, very happy with it
